Thank you consulting Anglian Water on the housing sites being proposed for inclusion in the Stadbroke Neighbourhood Plan. I would be grateful if you could confirm that you have received this response.

Please find attached a spreadsheet which outlines Anglian Water's comments relating to the availability of wastewater infrastructure to serve the potential housing sites. Essex and Suffolk Water are the water undertaker for the Parish and should also be consulted on the implications of these sites for their water infrastructure.

I would also make the following general comments:

Water Recycling Centre capacity

Anglian Water has made an assessment of the available capacity at Eye Water Recycling Centre (formerly known as sewage treatment works) for each of the proposed sites within the Parish where the scale of housing has been provided.

It is important to note that this assessment does not take account of the cumulative impact of development on Eye Water Recycling Centre.

The sites highlighted in yellow are those for which the amount of housing development has not been specified. If you are able to clarify the amount of housing development for these sites we would be able to comment further on this issue.

Sewerage network

The foul (or used water) flows from future growth will have an impact on the existing foul sewerage network. We have undertaken an initial assessment but each site will be looked at specifically when we are approached by a developer.

The foul infrastructure requirements will be dependent on the location, size and phasing of the development. All sites will require a local connection to the existing sewerage network which may include network upgrades.

The enclosed spreadsheet identifies where there is expected to be a need for improvements to the existing network to enable development of sites NP1, NP2, NP3, NP5, NP7, NP8, Part NP11 and NP12 which have been proposed. The highlighting of these potential upgrades should not be seen as an objection to the allocation of these sites as we can work with the Mid Suffolk Disyrict to ensure development is brought online at the correct time. Upgrades are to be expected as our sewers are not designed to have capacity for all future growth.

The sites highlighted in yellow are those for which the amount of housing development has not been specified. If you are able to clarify the amount of

housing development for these sites we would be able to comment further on this issue.

Asset encroachment

Where there are sewers or water mains crossing the site, the site layout should be designed to take these into account; this existing infrastructure is protected by easements and should not be built over or located in private gardens where access for maintenance and repair could be restricted. The sewers or mains should be located in highways or public open space. If it is not possible to accommodate the existing sewers or mains within the design then diversion may be possible under section 185 of the Water Industry Act 1991 or entering into a build over/near agreement may be considered.

Further information can be found on our website at the following link http://www.anglianwater.co.uk/developers/encroachment.aspx

Should you have any queries relating to this response please do not hesitate to get in touch.

Regards,

From Anglian Water:

Sustainable Drainage Systems (SuDS) are approved as part of a planning permission for development. As part of which Local Planning Authorities including Mid Suffolk District Council are required to consult the Lead Local Flood Authority on whether the management of surface water as proposed is appropriate and ensure through the use of planning conditions or planning obligations there are clear arrangements are in place for on-going maintenance over the lifetime of the development.

The attached plan shown the 11kV overhead line supplying Stradbroke. The village is fed via two circuits, one shown in green and the other shown in yellow.

in the future would ideally be connected along this 'main line' which will be beneficial The circuit shown in green is the Stradbroke feeder from Eye Primary and the circuit shown in yellow is the Eye feeder from Laxfield Primary. The connection of any load electrically. The other overhead lines shown are 'spurs' off the main line and therefore less ideally suited to the connection of load in the future.

I'm not sure exactly what information you require going forward but please feel free to contact me if you want any information and I will try and help you.

Many thanks

1000	Sixth	35.00	35	35	£	19,907	£	696,745

Dwellings	All Phases - Total Contribution	
100		£91,809
300		£828,027
500		£1,564,245
800		£3,148,113
1000		£4,526,756

In the Stradbroke and Laxfield ward there are 4 settings, with a predicted surplus of 43 places in September 17.

Providers Postcode	Setting Name	Provider Type	Total hours provider is open for per	hours per week of early education is	weeks a year is early education	Maximum number of children at any one time	Max of Early Education Places	Education	Number of		Sept 2017 Predicted
IP13 8HD	Laxfield Pre-School Group	Group Provision	35	35	38	30	60	60	31	0	13
IP21 5LU	SH	Childminder	50	30	49	6	12	15			14
IP21 5HH	Tiddlywinks Day Care Stradbroke	Group Provision	15	15	38	24	24	24	12	1	5
IP21 5LR	Wilby Primary School	School Nursery	30	30	38	13	26	26	10		11

Only the childminder offers hours that would be considered full day care. Parents needing childcare currently travel to a range of other settings:

Tiddlywinks, Stradbroke 9
Jungle Cubs & Jungle Giants Childcare 1
Laxfield Pre-School Group 5
Presmere Day Nursery 1
Tiddlywinks Nursery 2
Sweet Briar Nursery School (now closed) 2
JQ (CM) 1

Wilby Primary is aiming to lower it's entry age to include funded two year olds. The childminder works with the school to offer after school care.

Birth data from the CC SOA:

Children's Centre	LSOA Code	0yr	1yr	2yr	3yr	4yr	5yr	Under 6	Under 5	Under 3
Eye	E01030082	25	18	18	32	18	23	134	111	61

Shows that there are on average 22 children in each cohort, but coming from a wider area.

On the basis of the figures seen above, an increase in housing would have following impact in that ward:

Increase in houses	Predicted number of 0-4 year old children		contribution from developers	
100	10	33		
300	30	13		
500	50	-7	£58,331	
800	80	-37	£308,321	
1000	100	-57	£474,981
